PROFILE

Backend-focused full-stack developer and app builder studying Materials and Metallurgical Engineering at the University of Ilorin. Experienced in APIs, database-backed systems, mobile apps, desktop apps, Node.js, TypeScript, React Native, Electron, Supabase, MySQL. Seeking software engineering, backend engineering, full-stack, or mobile app internship roles.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS
Frontend: React, Next.js
Mobile/Desktop: React Native, Expo, Electron
Backend: Node.js, Django, REST APIs, authentication, server-side logic
Data/Cloud: Supabase, MySQL, Docker, Google Cloud, Git, GitHub

EXPERIENCE

App Developer / Team Lead - Galen Africa | 2025 - Present

- Lead development and management of GalenDesk, a pharmacy management system.
- Build mobile features with React Native and desktop functionality with Electron.
- Work across backend integration, database workflows, product direction, and app reliability.

Backend Developer - Afrigenomed | 2024 - 2026

- Worked on the Node.js backend for a learning management system.
- Built backend logic supporting users, content, and learning workflows.
